Dementia Carers Instrument Development: The DECIDE Study

You have now reached the second and final follow-up time point. If you are no longer caring for someone with dementia who is living in the community then please tick the box below and return the questionnaire pack in the stamped addressed envelope provided. You do not have to complete the other questions. By 'living in the community' we mean people living in their own homes or with someone else, not people living in residential or nursing home care.

I am no longer caring for someone with dementia who is living in the community

If you are still caring for someone then please complete the questionnaire pack and return it in the stamped addressed envelope provided.

There are four sections.

Section One: questions asking about what your life is like as a carer.

Section Two: questions asking you about your overall health.

Section Three: questions asking you about your emotional well-being.

Section Four: questions asking about you and the person you care for.

- Please answer as honestly and accurately as you can.
- There are no wrong answers.
- Completing the questionnaire will take about 20-30 minutes.
- Please read each question carefully.
- The information you provide will be treated confidentially.

If you have any queries or need any help with completing the questionnaire, please contact one of the DECIDE research team:
